

**Hello.
We are
KISTERS.**

Experts in environmental solutions and IT.

KISTERS is dedicated to developing comprehensive IT solutions that include innovative software, 3D printers and advanced environmental monitoring instruments. We provide our customers with truly reliable, data-driven insight and technology, enabling them to make informed decisions for the responsible management of natural resources.

first**

**Empowering
decisions
of tomorrow**

Our mission.

Driving the energy revolution, addressing the impacts of climate change and promoting the sustainable use of resources are the key drivers and motivators behind our work. The responsible use of the earth's resources is ingrained in our philosophy.

Our commitment is evident in the development of solutions that empower our customers to make informed decisions and act responsibly. With over 60 years of experience in digitally capturing the changing world, analysing and visualising data, we strive to contribute to a more sustainable future.

“Everything we do is based on making a positive contribution to the environment, society and each individual.”

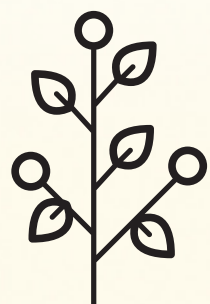

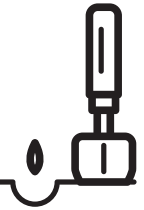

Klaus Kisters, CEO

The roots we come from.

Founded in 1963 as an environmental consultancy office, KISTERS today is an international environmental data and insights organisation specialising in the water, energy, environment and IT sectors. Environmental data management is the common core of almost all business areas – and has been our passion from the foundation on.

Interaction and engagement with our global team of 750 colleagues from more than 30 nations means you can expect both team spirit and mutual appreciation – but above all, we still are a family company with heart and soul.

What we do.

Our customers come from a wide range of industries around the world. Whether you represent a government agency or a private company, we can help.

/ Energy
& Renewables

A photograph of several wind turbines situated on a grassy hill under a clear sky.

/ Water, Weather
& Environment

A close-up photograph of a person wearing blue gloves using a glass bottle to collect a water sample from a stream.

/ Occupational Safety
& Compliance

A photograph of a female worker wearing a white hard hat and safety glasses, looking off to the side.

/ Environmental
Consulting

A photograph of a worker in an orange safety suit and helmet working inside a large circular trench or pipe.

/ 2D / 3D Printers
& Scanners

A photograph of a 3D printer's internal mechanism, showing the print head and the partially completed object.

/ 3D Visualisation

A photograph of a person's hand pointing at a large screen displaying a complex 3D CAD model of a mechanical assembly.

Our offering.

/ Energy & Renewables

We design solutions that are powerful tools for good decision-making in a dynamic energy and renewables market.

/ Water, Weather & Environment

We develop both software and hardware solutions to help you overcome the many challenges of monitoring water, weather and environmental data.

/ Occupational Safety & Compliance

We create software solutions that help you take a holistic approach to managing health, safety and the environment.

/ Environmental Consulting

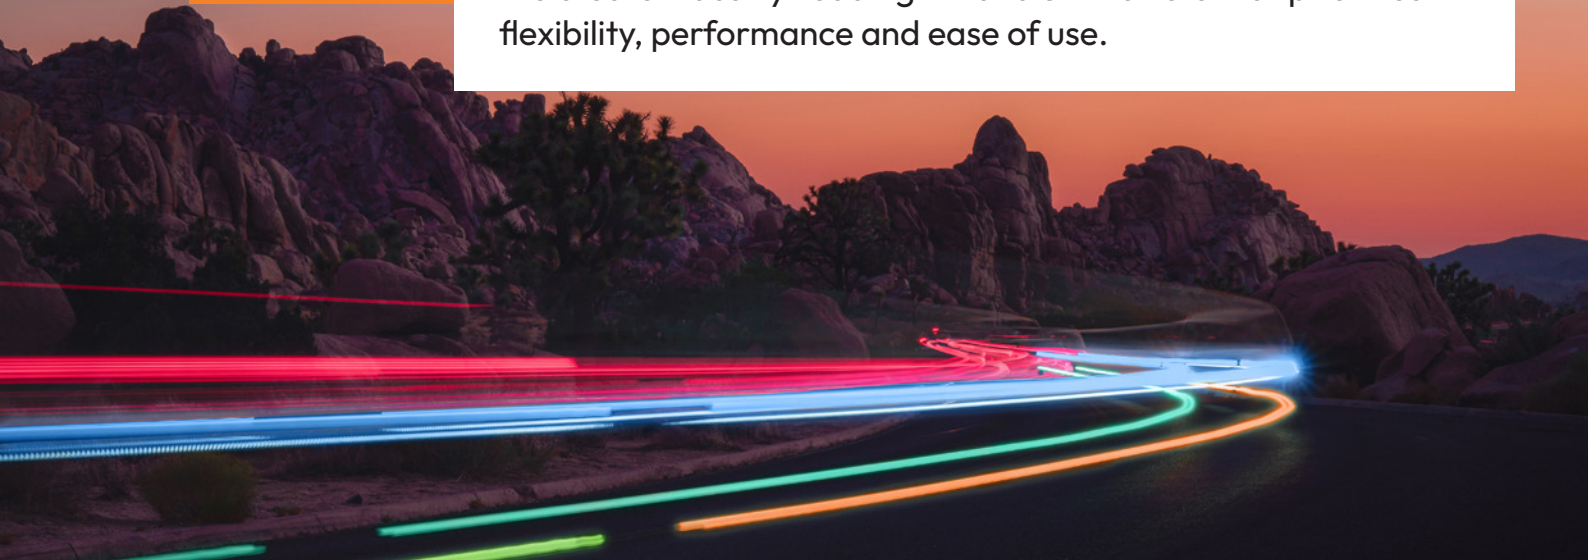

We bring projects in urban water management, civil engineering, development, and hydraulic engineering to life with our leading consultancy expertise.

/ 2D / 3D Printers & Scanners

We offer a comprehensive product portfolio covering all market-relevant technologies, manufacturers and the necessary print media and consumables.

/ 3D Visualisation

We create industry-leading 2D and 3D viewers that prioritise flexibility, performance and ease of use.

IT solutions for sustainable resource management.

The future of our planet requires bold decisions more than anything else. To turn those decisions into visionary action, they need to be based on data, modern technology and smart ideas. Our job is to deliver that data. We provide IT solutions and services that help our clients collect, process and understand the data they need. In doing so, we enable them to sustainable actions and decisions.

Together, we are helping to reduce the impact of climate change so that we can all look to the future with confidence.

What makes us unique.

We embrace challenges.

We're not afraid of a challenge because we have faith in our expertise to always find a solution that works.

We work together.

We strive to work together as one global team to create game changing solutions that can make a positive difference.

We are driven by passion.

We believe that our solutions will be greater if we use our passion to solve problems – Our passion for data, for IT, and for the environment.

We care for our people.

We put people above everything else. We always strive to be kind, helpful and look after one another because it is our people and customers that allow us to do great in this world.

A family company in every regard.

At KISTERS, being a family organisation goes beyond the Kisters family name; it embodies our philosophy and management style. With 750 colleagues from over 30 nations, we cultivate a daily interaction based on fairness, international diversity, team spirit and mutual respect.

We believe in the power of uniqueness, equal opportunities and fostering a sense of belonging for people from all backgrounds. Recognising that creativity and innovation thrive in a culture of diversity, inclusion and equality, we've embedded these principles at the core of our business.

To achieve this, we value direct dialogue and embrace an open-door, collaborative management style. It is this commitment that defines us as a family company with heart and soul.
