

## Optimise your water quality measurements.

Bringing you advanced levels of automation, quality control and data visualisation, our water quality modules KiWQM and KiECO make managing – and reporting on – valuable ecological data easier than ever before.

### Why choose **KiWQM**?

Manage, assess and report on environmental samples with KiWQM – our comprehensive water quality module that gives you a seamless flow of data from discrete sampling events and continuous monitoring networks.

#### **Watershed analysis.**

Develop a holistic understanding of your water data with everything in one place, to everyone with sites designed to international web standards.

#### **QA/QC automation.**

Automate quality control, validate data values and verify spot samples to control lab costs.

#### **Data optimisation.**

Improve the quality of your data, identify trends, and easily pinpoint suspect data.

#### **Report generation.**

Translate, calculate and share environmental health report cards with the public.

#### **QAPP compliance.**

Meet Quality Assurance Project Plan requirements with extensive metadata storage.

### Why choose **KiECO**?

Make biological surveys and taxonomic data accessible like never before within one comprehensive reporting system. A unique ecological data module, KiECO empowers you to align multidisciplinary data across time scales for rigorous analysis and thorough reporting.

#### **Comprehensive reporting.**

Plan, store, analyse and share multidisciplinary datasets in one single system.

#### **User-defined flexibility.**

Track methodologies, properties and codes without waiting for administrator permissions.

#### **Unlimited storage.**

Achieve comprehensive biological survey records that comply with quality assurance protocols.

#### **Advanced visibility.**

Publish observational data and insights seamlessly via the web portal.

#### **QAPP compliance.**

Meet Quality Assurance Project Plan requirements with extensive metadata storage.

# Water quality

## What is WISKI?

KiWQM and KiECO are powered by WISKI, the all-in-one software solution that makes it easy to collect, analyse and share critical environmental data – helping your team make the decisions that will shape tomorrow.

Whether you're managing networks, monitoring water quality, forecasting weather events, or operating critical systems, WISKI turns diverse, disorganised data into unified insights so you can get to the right answers faster.

## Who are we?

We're KISTERS – and for over 60 years, we've specialised in helping our customers collect, analyse and share the environmental data that will shape the future.

Through innovative, digitally-focused solutions, we develop advanced systems that enable our customers to capture and manage information at a higher quality than ever before. So they can make the solutions our world needs to thrive.

## Book your demo now.

Want to find out if WISKI is right for you? Speak to a member of our team about booking your live demo today.
