

Experience the evolution of your Data Management System.

Organisations can now enhance their data analysis with KISTERS Analytics, going beyond existing functionalities to seamlessly couple, visualise and control customised processes or models through this innovative interface between data and processes.

Why choose KISTERS Analytics?

-  **An all-in-one solution.**

A robust core framework with centralised control, granular monitoring, automation and the ability to connect WISKI to open-source programming. Seamless integration of virtually any algorithm or application, including other KISTERS applications such as real-time optimisation and data validation.
-  **Developed with industry expertise.**

Developed with deep industry expertise, this product has a growing catalogue of proven methodologies and models that can be applied across multiple sectors.
-  **Advanced data processing tools.**

Easily link your data to algorithms, regardless of source, and analyse, modify and model across systems. Incorporate, reuse and reconfigure any algorithm as needed, and reuse DMS configurations across diverse systems. Enjoy on-the-fly and online monitoring, resolve system issues quickly, customise workflows and more.
-  **Endless development possibilities.**

Experience comprehensive services that go beyond algorithm customisation and integration, with KISTERS' round-the-clock support and expert advice. Let's work together to design a data processing programme that meets your needs.
-  **An ever-growing catalogue.**

Build your own catalogue of data analysis and modelling processes, reuse existing algorithms, or choose between in-house development with a user-friendly interface or development by KISTERS.
-  **Meet evolving business needs.**

Studies show that advanced analytics software can boost productivity and efficiency by 5-10% and deliver up to 5x higher ROI on data investments (Gartner Group).

What is WISKI?

KISTERS Analytics is powered by WISKI, the all-in-one software solution that makes it easy to collect, analyse and share critical environmental data – helping your team make the decisions that will shape tomorrow.

Whether you're managing networks, monitoring water quality, forecasting weather events, or operating critical systems, WISKI turns diverse, disorganised data into unified insights so you can get to the right answers faster.

Who are we?

We're KISTERS – and for over 60 years, we've specialised in helping our customers collect, analyse and share the environmental data that will shape the future.

Through innovative, digitally-focused solutions, we develop advanced systems that enable our customers to capture and manage information at a higher quality than ever before. So they can make the solutions our world needs to thrive.
